BRIANNA YOUTE

SOFTWARE ENGINEER

PROFESSIONAL SUMMARY

Software Engineer with 2 years of experience and a strong passion for backend development, data analytics, and machine learning. Adaptable, self-motivated, and dedicated, committed to honing skills and contributing meaningfully to the ever-evolving landscape of technology. Striving to build innovative solutions that have the power to shape the future with a fusion of code and creativity.

EMPLOYMENT HISTORY

APR, 2023 - AUG, 2023
Software Engineering Intern, Pluralsight

During my immersive training with Pluralsight and YearUp, I dedicated over 400 hours to hands-on learning in modern software engineering. Here's what I accomplished:

- **Java and Spring Mastery:** I deeply grasped Java and the Spring Framework, building robust applications through object-oriented programming.
- **Git/GitHub Skills:** I proficiently used Git and GitHub for streamlined collaboration and efficient code management.
- **SQL Database Expertise:** I designed efficient databases using SQL, optimizing indexes and constraints.
- **Software Development Fundamentals:** I mastered essential programming concepts, enabling me to create software programs and rigorously test code.
- **IntelliJ Efficiency:** I utilized IntelliJ for seamless code writing, building, debugging, and execution.
- **Insight into App and Web Development:** I gained insights into both application and web development, understanding their nuances.
- **Strong Software Fundamentals:** I built a foundation in software engineering principles and database management.
- **Effective Team Participation:** Actively contributing in meetings and providing valuable follow-up measures to support the team.

EDUCATION

2021 - 2022
Broward College

2023 - 2024
B.S. in Software Engineering, Western Governors University
